ATEN Showcases 3-in-1 Solution at InfoComm 2016 (Booth #C5441)
Video Wall, Media Player, and Video Splitter Combined in New VS1912

FOOTHILL RANCH, Calif., May 25, 2016 /PRNewswire-iReach/ -- ATEN, the world-leading designer and manufacturer of advanced connectivity and management solutions, is pleased to announce that it will showcase the new VS1912 3-in-1 video wall, media player, and video splitter solution at ATEN booth #C5441. Other key highlights at ATEN's InfoComm booth include live product demonstrations of the Control System, the Modular Matrix Switch Series and the 4K HDBaseT extension solution. ATEN will also host a training session on "Beyond extension - how ATEN's HDBaseT total solution can maximize your ROI" during HDBaseT Installers Academy at the HDBaseT booth #C4823 on June 9th between 11 am – 12 pm.

• **VS1912 12-Port DP Video Wall Media Player** – ATEN's 3-in-1 video wall, media player, and video splitter solution allows users to design creative video wall displays with overlapping media content and versatile video wall layouts – from standard to asymmetrical. The product's media player can play multiple photos, videos, and office files simultaneously. The VS1912 also features an easy-to-use web GUI for video wall setup and profile scheduling that can be set weeks in advance. With its superb 1080p resolution, the VS1912 provides an ideal solution for multi-display applications such as digital signage, video walls, projection screens, and digital board installations either through DisplayPort or DVI.

• **Modular Matrix Switch Series** – The VM1600 offers real-time control and advanced management for up to 16 sources and 16 displays simultaneously through its eight interchangeable I/O boards on a single chassis. With the flexibility of ATEN's hot-swappable HDBaseT, HDMI, DVI, and VGA I/O boards, operators can conveniently control a matrix of 4x4 to 16x16 input/output devices through front-panel pushbuttons and a browser-based GUI, for simplified setup and control. The VM1600 is ideal for time-critical situations such as live event broadcasting, security surveillance, and transport management. The upcoming VM3200, which allows connection and control up to 32 sources to 32 displays, will also make its North America debut at the show.

• **ATEN Control System** – The ATEN Control System, through its intuitive GUI, simple setup process, configuration, and iPad control, empowers individuals without a technical background to easily manage and control any device in a room. With the ATEN Control System, anyone can easily set up the perfect meeting, training program, or video conference.

• **HDBaseT Products** – As a proud member of HDBaseT Alliance, ATEN will showcase its HDBaseT-certified matrix switches, splitters, extenders, and receivers at both ATEN (Booth #C5411) and the HDBaseT (Booth #C4823) booths. HDBaseT technology provides a simple and cost-effective standard to transmit A/V and control signals up to 330 feet over a single Cat 5e / 6a cable.

About ATEN

ATEN is a leading manufacturer of KVM (keyboard/video/mouse) switches in addition to remote management, LCD consoles, video and data connectivity solutions. "Simply Better Connections" represents the core value of the ATEN brand. It means providing innovative technology solutions to connect people with information and content, seamlessly. From enterprise-level IT, data center management and green energy solutions to an array of professional Audio/Video and consumer electronics products, ATEN is focused on quality, reliability and efficiency.
