

EZTalks Debuts Its All-in-One Video Conferencing Device at InfoComm India 2016

HONG KONG, Sept. 5, 2016 /PRNewswire/ -- EZTalks Technology Co., Ltd., a professional video conference service provider with more than six years' experience on video communication technology, is exhibiting for the first time on Indian soil, at InfoComm India (Booth E60).

InfoComm India is the nation's foremost professional audiovisual and information communications technology show. It is also a feast where influencers and decision-makers seek and find solutions to propel their businesses.

InfoComm India 2016 will be held in Mumbai on September 12-14 at Bombay Exhibition Centre with EZTalks, the most innovative video conferencing provider, showcasing their radically simple cloud-based conferencing software and a professional on premise video conferencing solution, in addition to, a portable all-in-one HD video conferencing device -- "EZTalks Onion".

EZTalks connects businesses with award-winning conferencing technology that covers web, audio and video conferencing, brings the value of nonverbal communication, increases productivity and improves both business and personal relationship. EZTalks' global marketing director Jack Zhang said: "A majority of survey respondents reported that video conferencing reduces the time needed to complete a project, which decreases the likelihood of multitasking. EZTalks' cloud-based video conferencing, on-premise video communication solution, and all-in-one HD video conferencing device helps more than 3,000 customers to thrive and be successful -- both in and out of the meeting room."

"We are excited to showcase our newest all-in-one video conferencing equipment -- 'EZTalks Onion' on exhibition site. Professional video communication technology should benefit all ordinary people's work as long as they want it." Jack added, "And it should be as easy and affordable as personal digital products instead of a huge investment of complicated devices and IT support." EZTalks Onion is created to lower the threshold of professional video communication system, both software and hardware, in the way of cutting down price and reducing setting procedures.
