

ClearOne Adds Two New Powerful DSP Mixers to its CONVERGE® Pro 2 Lineup

Newest Additions Give AV Practitioners Will Appreciate New Features, Flexibility and Affordability

SALT LAKE CITY, June 13, 2017 /PRNewswire/ -- ClearOne [NASDAQ: CLRO], the leading global provider of audio and visual communication solutions, launches two new and affordable CONVERGE Pro 2 DSP mixers, joining the already impressive lineup. The company will be displaying the new mixers at InfoComm (Booth 3421), June 14-16 in Orlando.

The new CONVERGE Pro 2 48V provides four mic/line inputs with ClearOne's next-generation Acoustic Echo Cancellation (AEC) technology, eight mic/line outputs, and a VoIP interface with two default phone lines — and three more available through a software upgrade.

The 48V shares an important distinction with its two VoIP counterparts, the 128V and the 128VD, being Cisco and Avaya certified with a native interface for Skype® for Business; the free software upgrade coming in Q3.

The new CONVERGE Pro 2 012 is a 12-mic-line outputs-only DSP mixer providing the option of increased outputs when required. It creates a neat, economical solution to what might otherwise require a more expensive design.

"These two new DSP mixers meet market demand for flexible and economical choices in professional-quality conferencing audio," ClearOne Senior Director of Product Line Management for Pro Voice and AV Networking, Durai Ramachandiran said. "The CONVERGE Pro 2 DSP product line continues to offer unbeatable options for — and outperforms in — *any* size room, *any* audio environment, *any* application."

The new CONVERGE Pro 2 mixers are shipping at the end of August 2017. Contact ClearOne for pricing.
