

Hisense Introduces Professional B2B Display Series at InfoComm 2017

New 4K and full HD models offer industry-specific technologies for commercial installations

SUWANEE, Ga., June 14, 2017 [/PRNewswire/](#) -- Hisense, a multinational consumer technology leader and one of the largest global television manufacturers, today announced its new line of professional quality 4K and full HD displays designed for the B2B market. The professional B2B display series offers reliable, high-performance, simplified, yet effective displays optimized for digital signage and presentation applications.

Hisense's Prosumer Connected TV line, including the 4K U1600 and FHD F1600 series, is a picture-perfect solution for small to mid-sized businesses. The new lineup is specifically designed for digital signage, such as menu boards, retail advertising and navigation, as well as audio/video presentations in classrooms, conference rooms, houses of worship and more.

"As we further our expansion into the U.S. market, we are continuing to explore ways to broaden display innovations for both B2C and B2B applications," said Jerry Liu, CEO of Hisense USA Corporation. "This is a great start and we are excited to introduce larger screen sizes, ProAV interactive displays, video walls and venue signage for businesses in 2018."

The Hisense 4K U1600 Prosumer Connected TV series will be on display at InfoComm 2017 (Almo booth #C3161/W208A).
