

ROE Visual To Announce Ground-breaking New Products At 2018 Infocomm View new products and learn about updates at Booth N2014

SHENZHEN, China, May 30, 2018 [/PRNewswire/](#) -- ROE Visual will present its latest product offerings at Infocomm 2018 Booth N2014 from June 6-8, 2018, at the Las Vegas Convention Center. This year, ROE celebrates launch of its ground-breaking high-resolution Sapphire LED display and other cutting-edge touring and fixed-installation products. To showcase its expanded offerings, ROE is building an in-booth theater for attendees to enjoy presentation of the company's latest in an environment befitting of the magnitude of the new announcements.

The public is invited to join media at a Press Conference to be held at 3PM on June 6, 2018 at ROE Booth N2014 to learn about details of the Sapphire. Product Managers for Infocomm-launched products will be on hand alongside members of ROE's sales and marketing team to answer questions on new products.

Unleash your creative genius with Sapphire

The official launch date for the [ROE Visual Sapphire](#) is June 6, 2018 at the time of the Press Conference on this date, however, Infocomm attendees can preview aspects of this laser-sharp 1.5mm pixel pitch LED panel that offers a completely new approach to building and mounting large display LED screens at ROE Infocomm Booth N2014.

Black Marble by ROE Visual brings brilliant LED at your feet

ROE Visual will also showcase the Black Marble Glass LED platform, designed to offer LED floor solutions for concert stages, TV studios, commercial stands and a variety of other creative applications. The high-end glass or matte finish is remarkably strong and scratch-proof, while Black Marble's glass finish enhances the visual effect of its high-contrast panel. Similar to other ROE Visual products, [Black Marble](#) installs quickly and easily, reducing assembly time and labor costs.

Introducing the Diamond 2.6 series

The ROE Visual small-pitch Diamond 2.6 (DM2.6) offers a lifelike viewing experience with the convenience ultra-lightweight frame design for a wide range of indoor applications.

Diamond 2.6's Carbon and Magnesium frame design offers lightweight panels while black LEDs provide an incomparable viewing experience through high contrast and brightness. Magnetic assembly, flexible and curving [Diamond 2.6](#) panels are easy to set-up and disassemble.

"Infocomm show is an important exhibition for our industry where major players come together to share experiences and look for new products and innovations. This year, we are particularly excited to launch our Sapphire platform, showcase the new Diamond 2.6 series and introduce the Black Marble floor panels," said Tony Van Moorleghem, Director Product Management. "As we expand our product offerings, we are expanding our tradeshow team to include our product engineers and Product Managers. This year, Dries Vermeulen, the design genius behind the Sapphire platform will address journalists and the publics on the Sapphire platform," Van Moorleghem concluded.

ROE Academy Expansion

After a series of successful ROE Visual training sessions in the United States and Europe, the company is expanding the program. ROE offers a certificate program for lighting technicians and others who complete program on-site at either the Burbank, California or Leek, The Netherlands offices. Upon special request, the training can be offered off-site. Users of ROE products can learn more about system set-up, troubleshooting and preventative maintenance through the course.
