

Elo to Showcase Interactive Video Wall, Self-Service and Collaboration Solutions With Innovative Touchscreen Computing at InfoComm in Las Vegas

In-booth demonstrations include education collaboration, self-order checkout and enterprise AV tools enabling next-gen interactive signage

MILPITAS, Calif., June 6, 2018 /PRNewswire/ -- [Elo](#), a leading global supplier of touchscreen solutions, will be exhibiting at InfoComm in Las Vegas, June 6-8 at booth C1800, showcasing cutting-edge interactive digital signage, collaboration and self-service touchscreen solutions. The booth will feature Elo's latest touchscreens, customer demos, and partner installations—providing a full display of the latest in digital technology for enterprise, education, retail, hospitality and high-traffic public environments.

Elo will share the innovative ways companies, educational institutions and retailers are implementing interactive platforms and expanded functionality using touchscreen signage. Elo makes this transformation easy with compatible accessories and peripherals, including EMV payment, 2D scanners and biometric readers.

Booth highlights and demos include:

- Award-winning [EloView](#)® software, a SaaS platform designed to simplify and automate deployment of devices and content for interactive displays and streamline device maintenance with OS management, including remote and silent updates, kiosk lock-down, automatic provisioning and device management.
- Additional new products including Elo's Android-powered compute engine, the [Elo Backpack](#)™, versatile [L-Series 2.0](#) touchscreens and a touch-through glass PCAP demo.
- New bundled solutions for interactive learning and business collaboration that combine Elo touchscreens with software from DisplayNote Montage and Qwizdom to enable turnkey interactive solutions for enterprise and education.
- A new commercial-grade Elo Computer Module (ECMG3) featuring Intel® Core™ 6th-generation i7 makes field installation easy by sliding into the back of the touchscreen display, delivering one of the industry's thinnest commercial grade all-in-one large format touchcomputers.
- The award-winning [PanoScape™ experience](#), a state-of-the-art multi-functional video wall software created by DesignCentrix and utilizing Elo's commercial-grade large format 55-inch HD touchscreens. This demo replicates the PanoScape™ installation at Tulane University's AB Freeman School of Business.
