

STRATACACHE Announces Optika Display Captivate Series to Debut at InfoComm 2018

The High Precision Interactive Touch Wall is Featured in Baanto International's Booth

DAYTON, Ohio, June 6, 2018 /PRNewswire/ -- Optika Display, leaders in the LCD enhancement market, will represent the STRATACACHE family of intelligent digital signage/marketing technology companies at InfoComm 2018, unveiling their new Captivate Series, a cutting-edge touch video wall for team collaboration at InfoComm 2018. Optika's optically bonded video wall is a sleek and seamless experience that utilizes ShadowSense™ touch technology, developed by series co-developers Baanto International, to provide users with a fast, accurate and interactive solution. The latest addition to the Optika Display product line up, the Captivate Series, will be on display in booth N2222 by Baanto International during InfoComm, being held June 6-8 in Las Vegas.

Optika solutions will be featured alongside their partners' most innovative products in the following booths:
Baanto International (Booth N2222) - Optika, for the first time, will be showcasing a 153" touch video wall as part of the Captivate Series. Through the collaboration with Baanto International and their ShadowSense™ touch technology, the Captivate Series high performance touch video wall promotes simple and slim integration with a completely flush, optically clear surface enabling true edge-to-edge interaction, complete with a narrow bezel allowing it to fit into any environment.

FlatFrog (Booth N2614) - Optika's 65" optically bonded display works seamlessly with FlatFrog's state-of-the-art InGlass™ technology. The InGlass technology offers a unique combination of multi-touch-pen and glove and over 1000 pressure levels on an ultra-thin edge-to-edge design, making it the perfect solution for team collaborating in every setting.

Salamander Designs (Booth N1516) - Optika Collaborate Series 55" and 85" displays will be showcased using Salamander Designs premium on-wall mounting solutions. Optika partnered with Salamander Designs to ensure that even the largest touch screen displays stay securely in place.
