

Casio Projector Receives Prestigious Recognition From rAVe Publications' Editors

LampFree® XJ-UT351WN Named Best of InfoComm 2018 Award Recipient

DOVER, N.J., July 26, 2018 /PRNewswire/ -- [Casio America, Inc.](#), a pioneer in the digital projection space, is proud to have been named a Best of InfoComm 2018 Award recipient from rAVe Publications. [The LampFree® XJ-UT351WN Ultra Short Throw projector](#) was honored with the "Best Short Throw Projector" and "Best New Meeting Room Projector" recognitions by rAVe's editors after carefully touring the entire InfoComm convention and reviewing the newest products on the market.

Each year at InfoComm, rAVe's knowledgeable team personally visits every booth on the show floor to see the newest products on the market and are always on the lookout for those that are innovative and make an impact on the industry. After reviewing each product's features and benefits, the XJ-UT351WN was named as an award winner in not one, but two categories this year!

"Casio is consistently committed to providing the most robust and innovative, LampFree projection solutions," said Joe Gillio, Senior Director Strategic Planning and Marketing, of Casio's Business Projector Division. "Our XJ-UT351WN is a powerhouse when it comes to environments, like conference rooms and classrooms, where ultra short throw projection is the ideal choice, and we are so honored that it has been named a Best of InfoComm award recipient from the rAVe team for its incredible performance and features."

Casio's XJ-UT351WN [Ultra Short Throw projector](#) is ideal for conference rooms and classrooms because of its two HDMI ports, dust resistant design and ability to generate large images over a very short projection distance. In particular, the built-in short throw lens and advanced mirror system provides an extremely close throw ratio (0.28:1) and can project a large 110" image onto a screen or wall. It provides an output of up to 3,500 lumens, yet doesn't impact the presenter or viewer even if they're standing close to the screen. The hybrid Laser and [LED light source](#) eliminates the need for expensive and hazardous mercury lamps while delivering a 20,000 hour estimated operating life. The wireless adapter (optional) gives the ability to control the projector from a smartphone, laptop, or tablet through Casio's C-Assist app.

The XJ-UT351WN is available for purchase through Casio's National Pro AV dealer network and authorized distributors with a MSRP of \$1,799.99. For additional information on Casio and its full portfolio of LampFree projectors, visit www.CasioLampFree.com.

About Casio LampFree® Projectors

Casio's portfolio of LampFree® projectors combines a laser, a fluorescent element and an LED light to deliver a mercury-free hybrid light source that lasts up to 20,000 hours while sustaining a high brightness and keeping maintenance costs to a minimum. Casio has five series of LampFree® projectors that are available for home, business, education and commercial applications - Core, Advanced, Slim, Ultra Short Throw, and 4K Ultra HD. For additional information on Casio's projector series and LampFree® technology, please visit www.CasioLampFree.com.
