

Yeastar to Showcase Its Flexible-first Workplace Scheduling and Visitor Management Solutions at InfoComm 2023

XIAMEN, China, May 23, 2023 /PRNewswire/ -- Yeastar (www.yeastar.com), the world's leading provider of Unified Communications solutions and Digital Workplace innovator, announced today that it will be exhibiting at InfoComm 2023 (IC 2023) in Orlando, Florida, from June 14 to 16.

At InfoComm, the premier event for the pro AV industry in North America, Yeastar will present [Yeastar Workplace](#), its flexible-first workplace platform and debut a series of new features, offering a glimpse into the future of hybrid workplace. Some of the highlights include:

- An online platform with three modules for [room scheduling](#), [desk booking](#), and [visitor management](#), to meet various business needs such as returning to the office, hot desking, and reducing real estate costs, etc.
- A range of devices to enhance employee experience and space utilization, from room schedulers, e-ink desk screens, and visitor screens to smart sensors for occupancy, people counting, and room comfort.
- Seamless integration with Microsoft Teams, Outlook Calendar, Active Directory, Exchange, Google Workspace, and more for a smooth user experience across platforms.
- New features in the latest update such as multi-location support, wayfinding, visitor badge printing, and more for a consistent and engaging digital experience.

"Flexible work is reshaping the office space and the needs of agile workers," said Prince Cai, Vice President of Yeastar. "As hybrid work becomes the new norm, we are excited to meet AV professionals at InfoComm 2023 and share how Yeastar Workplace can help them succeed in this changing technological landscape by enabling businesses to future-proof their workplace."

To see Yeastar Workplace in action, visit **booth 2580** for a live demo and a hands-on experience. You can also enter a lucky draw to win a room comfort sensor. [Register here](#) for free with Yeastar VIP code **YEA571**.
