ONELAN showcasing leading Enterprise CMS, SOC and Reserva Room Signage at InfoComm US

May 2017, UK: ONELAN, a global leader in digital visual communications, will be showcasing its leading-edge range of digital signage and Reserva Room Signage solutions at InfoComm USA between June 14th and 16th in Orlando, Florida. ONELAN will be on stand #521, as well as exhibiting its LG webOS solution with LG on stand #1626.

ONELAN's latest digital signage developments demonstrate its strategic commitment to providing scalable enterprise-level solutions to customers within retail and QSR environments, with innovative tools for managing a mixed network of devices, including Samsung Tizen and LG webOS screens; ONELAN Linux Net-Top-Box (NTB) appliances; BrightSign and NEC OPS players; and integrated POS screens.

ONELAN's SOC players enable software to be installed directly onto either a Samsung Tizen or LG WebOS 3.0 display, making installation simpler with no external player and reduced cabling. Integrated support for BrightSign players is new for InfoComm, providing even more flexibility for customers to select the right player and display for their budget and needs.

ONELAN's latest developments for corporate and education include Reserva Room Signage including options to choose between one or more of 13 different languages. Customers are also able to upload their logos, offering an additional internal channel for brand reinforcement as well as an enhanced capability for the room signs to operate as part of a corporate/campus communications network playing images, videos and HTML in conjunction with the room booking.
