

Sharp 120" Class 4K Ultra-High Definition LCD Display

Sharp is previewing its 120" Class 4K UHD Display*, at InfoComm 2016!

The massive display boasts 4K Ultra HD resolution (3,840 x 2,160), showcasing detailed text and breathtaking high-resolution content without sacrificing the viewable area with obtrusive bezels from large format video walls or requiring specialized light controlled environments that come with projectors.

It's direct-lit LED backlighting delivers natural, vibrant picture quality and uniform brightness. Providing high 4K UHD clarity for close viewing, this high-impact professional display is ideal for a multitude of environments, including data visualization, command and control, surveillance, boardrooms, and unified communications.
