

Future Generation Display Technology

85" 8K 120Hz LCD

## Sharp 85" 8K 120Hz LCD Display

A part of Sharp's inventory of Commercial and Professional High Definition and Ultra High-Definition displays, the 85" Class (diagonal) 8K 120Hz LCD display represents the future generation of commercial display technology and is so sharp it seems as if you're looking through a window.

Utilizing IGZO technology and featuring 16-times the pixel resolution of 1080p, wide color gamut technology and HDR functionality, this 8K Ultra HD display expands industry standard sizing options to include an 85-inch class model for businesses desiring a more affordable and competitively priced larger display option.

The 85" Class 8K display is designed as the narrowest, thinnest, and lightest display in its class and features an ultra-slim aluminum bezel, enabling simple installation and maintenance. It was engineered for 24/7 operation in professional and commercial settings and is an ideal option for businesses of all sizes.
