

Vaddio to Preview HuddleSHOT Conferencing Camera at InfoComm 2019

Try out the new conferencing camera for huddle spaces at InfoComm

Minnetonka, MN (June 4, 2019) – Vaddio will be bringing its new HuddleSHOT® Conferencing Camera to InfoComm booth 2500.

This all-in-one conferencing camera with integrated audio and an ultra-wide field of view is Vaddio's newest solution optimized for huddle spaces. It offers plug and play simplicity, robust stereo speakers, built-in microphones, modern aesthetics and remote management features.

"HuddleSHOT is the ideal camera solution for video collaboration sessions because its 125 degree field of view gets everyone in the picture, even in the smallest areas," said Jay Kilby, Director of Product Management at Vaddio. "In addition, its clear audio quality enhances collaboration on both ends of the call."

The [HuddleSHOT](#) offers two integrated speakers with wide dynamic range for robust stereo sound, as well as two built-in microphones that pick up participant voices from up to 12 feet (4 m) away.

HuddleSHOT is easy to deploy, easy to manage and easy to use. For huddle room users who need meetings to consistently start on time without any hiccups, the HuddleSHOT's plug and play simplicity makes it extremely straightforward. For AV and IT managers, Vaddio's intuitive browser-based user interface makes it simple to manage multiple HuddleSHOT cameras across different sites for easy enterprise deployments.

HuddleSHOT works with all major cloud-based conferencing applications including Zoom, Microsoft Teams, Skype for Business, Cisco WebEx, GoToMeeting and others.

HuddleSHOT will be at booth 2500 at InfoComm June 12-14, 2019.
