NEWS RELEASE

Yorkville Sound Exhibits at InfoComm 2017

Toronto Ontario – June 2017 –Yorkville Sound, leading manufacturer and distributor of pro audio systems and musical instruments is excited to announce they will be exhibiting at InfoComm 2017 (June 14-16) at the Orange County Convention Center in Orlando, Florida.

InfoComm is the largest professional AV trade show in North America, featuring the latest technologies for audio, video, display, projection and much more. With 1,000 exhibitors, thousands of products, and 40,000 attendees from 110 countries it's no wonder Yorkville has been an exhibitor for over 10 years.

The InfoComm show is your once-a-year opportunity to see the best in audiovisual technology and we encourage you to join us at Booth #6655 where we will be showcasing some of our latest pro audio equipment including: LP-LED4X, ART RM5 and our next generation élite series loudspeakers and subs.

LP-LED4X

- The next generation of LED Lighting, the LP-LED4X, has the same innovative specifications as our successful LP-LED4 Light Bar, but with significant upgrades to deliver maximum performance with minimal complications. Designed to be the ideal solution for any professional lighting application it can be easily transported to DJ shows and is capable lighting small or large venues. Multiple LP-LED4X can be connected and operated in unison with a standard microphone cable and our iOS and Android App, via Bluetooth, controls up to four individual LP-LED4X fixtures.

ART RM5

- Proudly invented in Canada, the RM5 monitor from ART achieves clarity, precision and a physical impact never before achieved in a compact studio monitor. The RM5 is the first all-aluminum space-saving cabinet design in the studio monitor market, featuring extended bass response achieved by its unique dual-opposing passive radiator design. A high resolution ring radiator produces smooth high frequency performance, with a unique center plug waveguide for excellent off axis support and a wide 'sweet spot'

élite Series Loudspeakers and subwoofers

- In the 1980's, Yorkville Sound changed the face of high-powered portable speakers with the launch of the élite series. Indestructible wood cabinets with high output drivers offered PA professionals & weekend warriors alike a new level of high SPL speakers in portable packages—30 years later we are changing the rules again. Come to Booth #6655 and experience our EF12P, EF15P, ES15P and ES18P.
