

Attero Tech Demonstrates Diversity at InfoComm 2017

Fort Wayne, IN - June 2017 ... Attero Tech, a leading manufacturer of affordable networked A/V solutions, will be showcasing their full line of endpoint connectivity solutions for networked audio at InfoComm 2017, June 14-16 in Orlando. Visit booth 6484 in the Orange County Convention Center and discover why Attero Tech is the connectivity solution of choice worldwide for installed AV projects large and small.

With support for Dante™ and AES67 connectivity, Attero Tech products are compatible with a wide range of leading manufacturers' DSP platforms, including Symetrix, QSC, Biamp, Bose, BSS, Media Matrix, Xilica, and more. From Cobranet to Dante and AES67, Attero Tech offers a broad range of connectivity options and robust, commercial-grade Bluetooth implementations.

At InfoComm 2017, Attero Tech will be demonstrating the results of their recent collaboration with QSC, delivering comprehensive audio and control integration between QSC's Q-SYS platform and Attero Tech's Dante- and AES67-enabled devices including the unHX2D HDMI audio-to-Dante de-embedder/embedder, the unD6IO-BT, and the new unAX2IO+ wall plates.

"Attero Tech was one of the early adopters of Dante connectivity, and we have been cultivating interoperability with every major platform," observes Attero Tech's AV Product Manager, Josh Arnold. "We've approached AES67 with the same philosophy, and we are out ahead of the pack in embracing AES67 connectivity too."

Check out the complete line of Attero Tech solutions at InfoComm 2017, booth 6484 in the Orange County Convention Center, June 14-16, 2017, or visit www.atterotech.com.

###

About Attero Tech

Located in Fort Wayne, Indiana, Attero Tech is a leading provider of unique and cost-effective networked AV solutions for all sized venues. Attero Tech solutions help AV systems integrators reduce cost, improve audio quality, future proof systems, and meet their most demanding design requirements. Leveraging their deep background in audio networking and audio theory, Attero Tech has developed innovative connectivity solutions for virtually any scenario.
