

## **RAPT Touch Introduces 'SOLAS™' Multi-Touch Software Platform For All Interactive Screen Sizes**

**RAPT TO DEMONSTRATE SOLAS™ AND 2nd GENERATION REFERENCE DESIGNS AT COMPUTEX AND INFOCOMM TRADE SHOWS.**

DUBLIN and SAN MATEO, Calif., May 19, 2016 /PRNewswire/ -- Today, RAPT Touch introduced the SOLAS™ software platform. SOLAS™ provides developers with the platform necessary to work seamlessly with the RAPT 2<sup>d</sup> Generation Reference Designs. With SOLAS™, customers have the ability to fully customize and enhance the experience of RAPT enabled products. SOLAS™ adds to the growing portfolio of RAPT Touch products, already boasting the OPTEO™ Chipset, all of which are based on RAPT's patented 'Frustrated Total Internal Reflection' (FTIR) multi-touch technology.

"Our customers recognize the multitude of opportunities to develop new and breakthrough interactive experiences with the RAPT Technology," said Cathal Phelan, chief executive officer at RAPT. "With SOLAS™, Developers are provided with a level of control and precision never experienced before in projected capacitive touch technologies. Unique end-user features of RAPT'S Technology, most notably stylus and pressure recognition, are leading to entirely new applications which invigorate the market for interactive products."

The software tools available with SOLAS™ enhance the value proposition of RAPT's Technology:

- 'Off-the-shelf' Components
- 'Flush-finish' Designs
- Extreme Low Latency
- Pressure Recognition
- No Special Layers
- Ease in Manufacturing
- Low Cost Basis

RAPT will demonstrate SOLAS™ and its 2<sup>nd</sup> Generation Reference Designs at Computex Taipei May 31 – June 2 and Infocomm Las Vegas June 8-10.

Established in 2008 by Owen Drumm and Gerry Giblin, RAPT's patented FTIR multi-touch technology is the only alternative to projected capacitive systems. RAPT's technology provides new breakthrough features at a cost which enables OEMs to sell in mass volume. RAPT provides OEMs with the tools to integrate RAPT's technology into their products and enables OEMs to work with their existing ODMs or Contract Manufacturers to build touch kits. RAPT is not a manufacturer.

About RAPT (<http://www.rapptouch.com>)

RAPT is the leading provider of alternative multi-touch reference designs and software for Global Consumer OEMs and Systems Integrators. The RAPT technology is widely accepted today as the best solution for large screen format and will be adopted in smaller screen sizes over time. RAPT is headquartered in Dublin, Ireland and led by a world-class team of industry veterans with expertise in launching products which can be manufactured in the millions of units. Besides Dublin, RAPT has offices in Silicon Valley, Taiwan and Switzerland.
