

## **BAKO's exhibited LED screens become one of the focuses in InfoComm 2017 Orlando**

SHENZHEN, China, June 16, 2017 /PRNewswire/ -- As one of the leading exhibitions in the LED display industry, InfoComm never fails to attract people's attention. Currently InfoComm 2017 is running smoothly in Orlando, USA. As an important participant, BAKO attracts many visitors because its products contain creative design and a perfect showing effect. Many clients gather in BAKO's booth, talking about the upcoming projects.

BAKO exhibits four featured items, which are the symbol of LED display business trends.

1) WAVE SERIES of P1.26 indoor LED display. For this item, the cabinet size is 608\*342mm, exactly a 16:9 ratio. The screen size is about 6.6sqm, making a 4K resolution. The display is one of the main focuses in the exhibition hall.

3) D-Pro series of P4.81 outdoor rental LED display. BAKO never stops foot for advance. To meet more demands from clients, BAKO has upgraded DIAMOND SERIES' and named it D-Pro series. In rental application, power and data stable is always the users' concern. Hence, BAKO removes the power and data cable and uses a pin type for replacement, making sure of its stable in use. Besides, it is 100% front service.

4) SPACESHIP SERIES of P8 SMD and P16 DIP. BAKO's revolutionary product in 2017 is sure to be the SPACESHIP SERIES. The cabinet size is 1024\*768mm. It can be applied for both outdoor fixed installation and perimeter LED display. Besides, since it is die-casting aluminum for both cabinet and the module frame, it can be applied in hot places. Many clients express that this is just their dream product for outdoor advertising.
