

The Video Wall Experience Redefined: Prysm's LPD 6K Series Makes Public Debut at InfoComm 2018

Prysm expands its global LPD 6K Series partner ecosystem, adding distribution agreements in the Middle East and China with FVC and Daheng while accelerating North America partner momentum

LAS VEGAS, June 6, 2018 /PRNewswire/ -- (InfoComm Booth #N1245)-- [Prysm, Inc.](#), a leading display and visual collaboration solutions provider, will publicly debut its [Laser Phosphor Display \(LPD\) 6K Series](#), a first-of-its-kind interactive single panel large-format display offering a panoramic image uninterrupted by seams or bezels, at InfoComm 2018. Additionally, the company is announcing new partnerships to meet customer demand for the LPD 6K with [First Video Communications](#) (FVC) in the Middle East and [Daheng](#) in China. FVC and Daheng are providing LPD6K installation and support services to local resellers to help assist customer deployments in their regions. In North America, customers have already bought the LPD6K from resellers, including [AVI-SPL](#), [Diversified](#), [IVCi](#), [SKC Communications](#) and [Unified AV](#).

The LPD 6K Series is targeted at experience/briefing centers, premium conference rooms and digital signage deployments. Unveiled in March, it eliminates the challenges associated with other video wall solutions, including:

- Intruding seams/bezels
- Lack of touch options or collaboration experiences in larger sized video walls
- Poor quality viewing at multiple angles
- Limited options for installation locations due to being too large to fit in elevators and small corridors

Since becoming available, Prysm has completed many customer installations of the new display at a variety of leading companies, from a top auto manufacturer to a premier consulting firm. Adding to this success, Daheng recently finished its first customer installation of the LPD 6K with People's Daily, one of China's largest newspaper groups.

"Today's enterprises are looking to encourage better workplace experiences. They require solutions that promote improved productivity and collaboration to drive business insights," said Amit Jain, CEO, Prysm. "To help meet global customer demand, we need to align with partners that have strong local presence in multiple countries, provide outstanding service and support, and have additional channel relationships. The LPD 6K provides another strong revenue opportunity for our partners, and we look forward to working with all of our key partners worldwide around new deployments."

Supporting Partner Quotes:

"FVC has partnered with Prysm in building a strong partner ecosystem in the MENA region for over two years now. FVC is excited about the launch of the LPD 6K. We see it filling a market opportunity for immersive displays in the 100 inches to 200 inches diagonal size range," said K.S. Parag, chairman, FVC. "We have a full set of complementary AV solutions to enable our channels and customers to enhance the LPD 6K technology offering in the emerging marketplace of experience centers and high-end boardrooms."

"Interactivity, stellar picture quality and energy efficiency are three of the top attributes our clients are asking for in next-generation video walls. The Prysm LPD 6K delivers an unparalleled experience, which is why we are seeing great demand for the solution from new and existing customers, such as People's Daily," said Macro Li, vice general manager, display technology division, Daheng.

During InfoComm 2018, Daheng and FVC will be available in the Prysm booth to meet with regional partners, customers and media by appointment.

Prysm InfoComm 2018 Demos, Activities and Customer Speaking Opportunities:
