

Nuri*Lites™ Fixtures at InfoComm

Next week, at InfoComm 2017 in Orlando, Florida, TMB will be featuring their new Nuri*Lites LED fixture range, now in stock and ready to ship!

June 12, 2017 -- Debuted at last year's LDI show, the Nuri*Lites range includes a selection of reliable LED fixtures that won't break the bank. Already well known for being "Way Better Than Darkness," Nuri*Lites, work-horse fixtures intended for the rental market, are offered in RGB, RGBW, RGBAW-UV, and Variable White versions. RGBW outdoor fixtures include the **Hurricane** wash, and the **Manhattan** wash with built-in W-DMX wireless, both IP 65 rated and ideal for illuminating structures and large areas indoors or out. The **Daiquiri** features a high-intensity, broad and quick zoom, with a body shape designed to keep cabling out of sight. The classic **Martini** is a variable white LED PAR, tunable from 2800 to 6500K. The RGBAW-UV **Highball** offers a very full color spectrum. The **Gimlet** tricolor mini PAR provides a strong punch in a very small package. Finally, the RGBW **Sidecar** wall washer is ideal for splashing vibrant colors on walls, drapes, or scenery.

Tough and resilient, the Nuri*Lites Hurricane proved itself recently in Abu Dhabi, where 100 of the outdoor fixtures survived a hurricane-force storm. "The fixtures survived and performed beautifully, with minimal fuss on our part," says James Lakin, Project Manager for Production Technology (Protec) of Dubai. "In addition to their IP rating, the Hurricane's cost/value factor influenced our decision. They are performing very well and we intend to increase our stock next season."

Guests at the TMB booth at InfoComm will see many other new and exciting products, including new Flare Q+ LR Linear, and Flare Q+ RZ Rayzr blade Solaris fixtures; new ProPlex Data Distribution DIN Rail and IP-Rated units; new ProPlex portable data cables, including steel braid reinforced ProPlex Fibre, ProPex RG-6 4K cable, and brand new ProPlex AES audio cable; plus Firefly Festoon, Fairy Lights, and FloppyFlex LED neon; IMS festoon/marquee lighting systems; new G5 W-DMX from Wireless Solutions, and much, much more! Stop by booth 7461 and say hello!

Rounding out TMB's presence at InfoComm is a training seminar presented by the irrepressible [Chris "Chippa" Curran](#). [Register now](#) to learn how complex show networking is made easy with ProPlex Data Distribution systems.

Nuri*Lites are exclusively distributed by TMB: www.tmb.com/products/489-nuri-lites. Learn about more innovative and exciting products from TMB at www.tmb.com
